

Congratulations!

**If you can read this -
you have Adobe Acrobat Reader installed on your computer.**

Use the “back” button on your browser to return to the previous page

Here are some tips for using Adobe Acrobat Reader

- Adobe Acrobat files are also called “pdf” files – they have the extension “.pdf” (such as filename.pdf)
- Web pages or your class site can have links to Adobe Acrobat (pdf) files
 - If you want to “View” the file – click on the link
 - The “pdf” file will open in your browser – new toolbars will appear above and below the document.
 - You should see them now if you are viewing this in a browser!
- Adobe Acrobat documents can have multiple pages
 - Use these controls:  to navigate between pages (they are at the bottom of the page in most browsers)
 - Try it now – this document has two pages – click on “forward” arrow 
- There is another toolbar above your document (below your browser’s toolbar)
 - Use these controls (on the upper toolbar) to zoom in and out 
 - Use this button to Save a copy of the PDF document 
 - You can also print the document 
- If your document has lots of pages you might also find the “pages” tab (on the side) helpful.
- When you are done – use the BACK button to return to the previous page

If you’d rather “Save” the document than open it – Right Click on the link (Ctrl-Click on a Macintosh) the choose “Save Target As” from the popup menu.

This is the second page!

Use these controls

to go back to the first page

you can also use the “backward” and “forward” buttons

in most browsers these controls are down below.
